

TITLE: INFORMATION TECHNOLOGY POLICY

The Board of Trustees recognizes that information technologies while able to improve the efficiency and effectiveness of college operations, also requires responsible and appropriate use. Toward that end, the Board of Trustees authorizes Gogebic Community College administration to establish the rules, regulations, and procedures necessary to provide a broad computing and network communication service that supports the campus infrastructure instruction, and its mission. Any misuse or inappropriate use, unauthorized access, or attempted access to files, programs, services, computing, and network services other than that authorizes and assigned as a user of the college's infrastructure, will be considered a security violation and will be subject to disciplinary action. This includes any and all actions applicable under College Policies and Procedures, College Acceptable Computer Usage Rules, and other related college policies, handbooks, or contracts.

Disciplinary action may include limited access to College information technology services and disciplinary action up to and including termination.

This policy will relate to all individuals who use Gogebic Community College's computing and networking services, on campus and off campus.

Date of Adoption: 8/28/12
